TOXICOLOGY

Subject index

Volume 111 (1996)

Age-related toxicity; Chlordecone; Carbon tetrachloride; Cell division; Tissue repair; Resiliency **111**, 29

Airborne; Analysis; Colophony; Gravimetric; Rosin; Sensitization **111**, 225

Air pollution; Particulate pollution; Respiratory disease **111**, 149

Animal model of MCS; Organophosphate DFP; FSL rats; Human depressives; Cholinergic supersensitivity **111**, 119

Animal models; Multiple Chemical Sensitivity (MCS); Kindling; Neural sensitization; Behavioral sensitization; Neural potentiation **111**, 87

Behavioral sensitization; Multiple Chemical Sensitivity (MCS); Kindling; Neural sensitization; Neural potentiation; Animal models **111**, 87

Beryllium; Health; Surveillance; Sensitization; Exposure **111**, 213

Cancer risk; Vinyl chloride; Early-life sensitivity; Exposure; Risk assessment **111**, 21

Carbon tetrachloride; Age-related toxicity; Chlordecone; Cell division; Tissue repair; Resiliency **111**, 29

Carcinogen-DNA adduct analysis; Non-invasive biomarkers; Occupational hazards; Exposure/effect assessment; Monitoring technique **111**, 207

Cell division; Tissue repair; Thioacetamide; Glucose; Palmitic acid; L-carnitine **111**, 163

Cell division; Age-related toxicity; Chlordecone; Carbon tetrachloride; Tissue repair; Resiliency **111**, 29

Chemical sensitivity; Formaldehyde; Formalin; Mesolimbic system; Sensitization **111**, 135

Chemical sensitivity; Theory for disease; Environmental exposure; Environmental etiology; Toxicant-induced loss of tolerance **111**, 67

Chemical exposure; Children; Unborn; Developmental stage; Toxicity; Risk assessment; Variability **111**, 15

Chemokine; Histamine releasing factors; Occupational asthma; Diisocyanate; MCP-1; RANTES **111**, 191

Chlordecone; Age-related toxicity; Carbon tetrachloride; Cell division; Tissue repair; Resiliency **111**, 29

Children; Unborn; Chemical exposure; Developmental stage; Toxicity; Risk assessment; Variability **111**, 15

Chloroform; Pharmacokinetic modeling; Risk assessment; Uncertainty; Variability **111**, 289

Cholinergic supersensitivity; Animal model of MCS; Organophosphate DFP; FSL rats; Human depressives **111**, 119

Colophony; Airborne; Analysis; Gravimetric; Rosin; Sensitization **111**, 225

Developmental stage; Children; Unborn; Chemical exposure; Toxicity; Risk assessment; Variability **111**, 15

Developmental toxicology; EPA risk assessment policy; Extrapolating toxicity data; Reproductive toxicology; Reproductive system risk assessment; Sperm staging **111**, 305

Diisocyanate; Histamine releasing factors; Chemokine; Occupational asthma; MCP-1; RANTES **111**, 191

Diisocyanate; Occupational asthma; Respiratory disease **111**, 181

Dose response; Risk assessment; Variability; Susceptibility; Risk factors **111**, 253

Early-life sensitivity; Vinyl chloride; Cancer risk; Exposure; Risk assessment **111**, 21

Environmental chemical intolerance; Sensitization; Olfactory; Limbic nervous system; Validity **111**, 101

Environmental etiology; Chemical sensitivity; Theory for disease; Environmental exposure; Toxicant-induced loss of tolerance **111**, 69

Environmental exposure; Chemical sensitivity; Theory for disease; Environmental etiology; Toxicant-induced loss of tolerance **111**, 69

EPA risk assessment policy; Developmental toxicology; Extrapolating toxicity data; Reproductive toxicology; Reproductive system risk assessment; Sperm staging **111**, 305

Exposure; Vinyl chloride; Early-life sensitivity; Cancer risk; Risk assessment **111**, 21

Exposure; Beryllium; Health; Surveillance; Sensitization **111**, 213

Exposure/effect assessment; Non-invasive biomarkers; Carcinogen-DNA adduct analysis; Occupational hazards; Monitoring technique **111**, 207

Exposure-response functions (ERFs); Toxic risk; Rocket launches **111**, 239

Extrapolating toxicity data; Developmental toxicology; EPA risk assessment policy; Reproductive toxicology; Reproductive system risk assessment; Sperm staging **111**, 305

Formaldehyde; Chemical sensitivity; Formalin; Mesolimbic system; Sensitization **111**, 135

Formalin; Chemical sensitivity; Formaldehyde; Mesolimbic system; Sensitization **111**, 135

FSL rats; Animal model of MCS; Organophosphate DFP; Human depressives; Cholinergic supersensitivity **111**, 119

Genetic susceptibility; X-rays; Ultraviolet light; Mutagenic chemicals; Safety factors **111**, 331

Glucose; Cell division; Tissue repair; Thioacetamide; Palmitic acid; L-carnitine **111**, 163

Gravimetric; Airborne; Analysis; Colophony; Rosin; Sensitization **111**, 225

Health; Beryllium; Surveillance; Sensitization; Exposure **111**, 213

Histamine releasing factors; Chemokine; Occupational asthma; Diisocyanate; MCP-1; RANTES **111**, 191

Human depressives; Animal model of MCS; Organophosphate DFP; FSL rats; Cholinergic supersensitivity **111**, 119

Kindling; Multiple Chemical Sensitivity (MCS); Neural sensitization; Behavioral sensitization; Neural potentiation; Animal models **111**, 87

Limbic nervous system; Sensitization; Olfactory; Environmental chemical intolerance; Validity **111**, 101

L-carnitine; Cell division; Tissue repair; Thioacetamide; Glucose; Palmitic acid **111**, 163

MCP-1; Histamine releasing factors; Chemokine; Occupational asthma; Diisocyanate; RANTES **111**, 191

Mesolimbic system; Chemical sensitivity; Formaldehyde; Formalin; Sensitization **111**, 135

Methylmercury; Perinatal exposure; Comparative human studies; Risk assessment **111**, 157

Monitoring technique; Non-invasive biomarkers; Carcinogen-DNA adduct analysis; Occupational hazards; Exposure/effect assessment **111**, 207

Monte Carlo simulation; Trichloroethylene; Risk assessment; Reproductive and developmental toxicity; Sensitive populations **111**, 271

Multiple Chemical Sensitivity (MCS); Kindling; Neural sensitization; Behavioral sensitization; Neural potentiation; Animal models **111**, 87

Mutagenic chemicals; Genetic susceptibility; X-rays; Ultraviolet light; Safety factors **111**, 331

Neural sensitization; Multiple Chemical Sensitivity (MCS); Kindling; Behavioral sensitization; Neural potentiation; Animal models **111**, 87

Neural potentiation; Multiple Chemical Sensitivity (MCS); Kindling; Neural sensitization; Behavioral sensitization; Animal models **111**, 87

Non-invasive biomarkers; Carcinogen-DNA adduct analysis; Occupational hazards; Exposure/effect assessment; Monitoring technique **111**, 207

Occupational asthma; Histamine releasing factors; Chemokine; Diisocyanate; MCP-1; RANTES **111**, 191

Occupational asthma; Diisocyanate; Respiratory disease **111**, 181

Occupational hazards; Non-invasive biomarkers; Carcinogen-DNA adduct analysis; Exposure/effect assessment; Monitoring technique **111**, 207

Olfactory; Sensitization; Limbic nervous system; Environmental chemical intolerance; Validity **111**, 101

Organophosphate DFP; Animal model of MCS; FSL rats; Human depressives; Cholinergic supersensitivity **111**, 119

Palmitic acid; Cell division; Tissue repair; Thioacetamide; Glucose; L-carnitine **111**, 163

Particulate pollution; Air pollution; Respiratory disease **111**, 149

Perinatal exposure; Methylmercury; Comparative human studies; Risk assessment **111**, 157

Pharmacokinetic modeling; Risk assessment; Uncertainty; Variability; Chloroform **111**, 289

Pharmacokinetic modeling; Risk assessment; Variability; Sensitive subpopulations **111**, 315

RANTES; Quantitative; Risk assessment; Risk management; Uncertainty **111**, 5

Reproductive system risk assessment; Developmental toxicology; EPA risk assessment policy; Extrapolating toxicity data; Reproductive toxicology; Sperm staging **111**, 305

Reproductive and developmental toxicity; Trichloroethylene; Risk assessment; Sensitive populations; Monte Carlo simulation **111**, 271

Reproductive toxicology; Developmental toxicology; EPA risk assessment policy; Extrapolating toxicity data; Reproductive system risk assessment; Sperm staging **111**, 305

Respiratory disease; Occupational asthma; Diisocyanate **111**, 181

Respiratory disease; Air pollution; Particulate pollution **111**, 149

Resiliency; Age-related toxicity; Chlordecone; Carbon tetrachloride; Cell division; Tissue repair **111**, 29

Risk assessment; Risk management; Quantitative; Uncertainty **111**, 5

Risk assessment; Children; Unborn; Chemical exposure; Developmental stage; Toxicity; Variability **111**, 15

Risk assessment; Vinyl chloride; Early-life sensitivity; Cancer risk; Exposure **111**, 21

Risk assessment; Xenobiotic metabolism; Sulfur-dependent detoxification pathways **111**, 43

Risk assessment; Methylmercury; Perinatal exposure; Comparative human studies **111**, 157

Risk assessment; Variability; Susceptibility; Dose response; Risk factors **111**, 253

Risk assessment; Pharmacokinetic modeling; Uncertainty; Variability; Chloroform **111**, 289

Risk assessment; Pharmacokinetic modeling; Variability; Sensitive subpopulations **111**, 315

Risk management; Risk assessment; Quantitative; Uncertainty **111**, 5

Risk factors; Risk assessment; Variability; Susceptibility; Dose response **111**, 253

Rocket launches; Exposure-response functions (ERFs); toxic risk **111**, 239

Rosin; Airborne; Analysis; Colophony; Gravimetric; Sensitization **111**, 225

Safety factors; Genetic susceptibility; X-rays; Ultraviolet light; Mutagenic chemicals **111**, 331

Sensitive populations; Trichloroethylene; Risk assessment; Reproductive and developmental toxicity; Monte Carlo simulation **111**, 271

Sensitive subpopulations; Pharmacokinetic modeling; Risk assessment; Variability **111**, 315

Sensitization; Olfactory; Limbic nervous system; Environmental chemical intolerance; Validity **111**, 101

Sensitization; Chemical sensitivity; Formaldehyde; Formalin; Mesolimbic system **111**, 135

Sensitization; Beryllium; Health; Surveillance; Exposure **111**, 213

Sensitization; Airborne; Analysis; Colophony; Gravimetric; Rosin **111**, 225

Sperm staging; Developmental toxicology; EPA risk assessment policy; Extrapolating toxicity data; Reproductive toxicology; Reproductive system risk assessment **111**, 305

Sulfur-dependent detoxification pathways; Xenobiotic metabolism; Risk assessment **111**, 43

Susceptibility; Risk assessment; Variability; Dose response; Risk factors **111**, 253

Surveillance; Beryllium; Health; Sensitization; Exposure **111,** 213

Theory for disease; Chemical sensitivity; Environmental exposure; Environmental etiology; Toxicant-induced loss of tolerance **111,** 69

Thioacetamide; Cell division; Tissue repair; Glucose; Palmitic acid; L-carnitine **111,** 163

Tissue repair; Age-related toxicity; Chlordecone; Carbon tetrachloride; Cell division; Resiliency **111,** 29

Tissue repair; Cell division; Thioacetamide; Glucose; Palmitic acid; L-carnitine **111,** 163

Toxicant-induced loss of tolerance; Chemical sensitivity; Theory for disease; Environmental exposure; Environmental etiology **111,** 69

Toxicity; Children; Unborn; Chemical exposure; Developmental stage; Risk assessment; Variability **111,** 15

Toxic risks; Exposure-response functions (ERFs); Rocket launches **111,** 239

Trichloroethylene; Risk assessment; Reproductive and developmental toxicity; Sensitive populations; Monte Carlo simulation **111,** 271

Ultraviolet light; Genetic susceptibility; X-rays; Mutagenic chemicals; Safety factors **111,** 331

Unborn; Children; Chemical exposure; Developmental stage; Toxicity; Risk assessment; Variability **111,** 15

Uncertainty; Risk assessment; Risk management; Quantitative **111,** 5

Uncertainty; Pharmacokinetic modeling; Risk assessment; Variability; Chloroform **111,** 289

Validity; Sensitization; Olfactory; Limbic nervous system; Environmental chemical intolerance **111,** 99

Variability; Children; Unborn; Chemical exposure; Developmental stage; Toxicity; Risk assessment **111,** 15

Variability; Risk assessment; Susceptibility; Dose response; Risk factors **111,** 253

Variability; Pharmacokinetic modeling; Risk assessment; Uncertainty; Chloroform **111,** 289

Xenobiotic metabolism; Sulfur-dependent detoxification pathways; Risk assessment **111,** 43

X-rays; Genetic susceptibility; Ultraviolet light; Mutagenic chemicals; Safety factors **111,** 331
